Profile

Full Stack Developer

Detail-oriented and passionate Full Stack Developer specializing in the MERN stack with hands-on experience in building scalable web applications and reusable UI components. Adept at designing efficient API integrations and implementing performance-driven front-end architectures. Seeking a challenging role to leverage my technical expertise and contribute to innovative software solutions that enhance user experience and business performance.

Work Experience

Senior Developer | Guestify | Jan 2025 – Oct 2025

- Led end-to-end design, architecture, and deployment of Guestify, a scalable event management platform.
- Architected complete MERN-based system integrating MongoDB, Express.js, React, and Node.js.
- Designed database schemas, optimized queries, and implemented server-side caching for improved performance.
- Developed reusable frontend components improving maintainability and development speed.
- Managed version control, CI/CD pipelines, and cloud deployment through Git and Netlify.
- Collaborated with UI/UX teams to deliver responsive and intuitive user interfaces.
- Oversaw bug tracking, code review, and performance optimization across multiple environments.

Junior Software Engineer | ERE Business Solutions Ltd. | Nov 2023 – Dec 2024

- Designed responsive user interfaces using React.js, JavaScript, and Tailwind CSS.
- Integrated RESTful APIs and state management (Redux/Context API) for smooth data flow.
- Participated in end-to-end project lifecycles including design, coding, testing, and deployment.
- Optimized web application performance by reducing component re-renders and improving bundle efficiency.
- Collaborated with QA teams to resolve bugs and implement enhancements based on client feedback.

Education

- **Bachelor of Technology in Computer Science and Engineering** | Royal College of Engineering and Technology, KTU | 2019 – 2023
- **Kerala Higher Secondary Education (NMHSS Tirunavaya)** | NCERT | 2017 – 2019 | 75%

Key Competencies and Skills

- **Full Stack Development** – Proficient in MERN stack for scalable web applications.
- **Frontend Engineering** – Skilled in React, JavaScript, Tailwind CSS, and Chakra UI.
- **Backend API Development** – Experienced in RESTful APIs, Node.js, and Express.js.
- **Database Management** – Strong in MongoDB design, indexing, and queries.
- **Version Control** – Git and GitHub workflow, branching, and CI/CD.
- **UI/UX Implementation** – Built responsive, user-friendly interfaces.
- **Testing & Debugging** – Hands-on with Postman and Chrome DevTools.
- **Deployment** – Experience with Netlify, Vercel, and cloud hosting.
- **Problem Solving** – Skilled in debugging and performance tuning.
- **Agile Development** – Worked in SCRUM-based project environments.

Technical Skills

- **Frontend:** React.js | JavaScript | HTML5 | CSS3 | Bootstrap | Tailwind CSS | Chakra UI
- **Backend:** Node.js | Express.js | MongoDB | Django
- **Version Control:** Git | GitHub
- **Tools & Platforms:** VS Code | Postman | Netlify | Vercel
- **Other:** RESTful APIs | Responsive Web Design | UI/UX Implementation

Projects

Guestify Events

- Developed a full-stack event management platform for event creation, registration, and guest interaction. Implemented real-time updates and analytics dashboards to enhance user experience and operational efficiency.

Moovo – AI-Powered Property Rental Platform

- Built an AI-driven platform for property rentals integrating image recognition for automated property categorization and intelligent search results.

License Plate Detection System

- Created a license plate recognition solution using OpenCV, implementing contour detection and OCR to extract plate numbers with high accuracy.

Personal Information

- Location: Dubai, UAE
- Nationality: Indian
- Languages: English | Malayalam | Hindi
